

“Imagination Creates Reality.”

— Richard Wagner

Creative Skills

Well versed in 2D and 3D design, painting, sculpture, photography and play.

Technical Skills

Fluent in Adobe Creative Suite, working knowledge of action script, CSS and HTML. I believe that these are just tools which help give form to the idea.

Experience

1997—Present

Freelance, Inc. — Provide design services including: web presence, identity and collateral development for varied clients when playing the game.

2004—2005

Wireless Generation, Inc. — Responsible for interface design of PDA applications and database driven websites for educational assessment products.

1999—2003

Fisher-Price, Inc. — Assisted creative department on a freelance basis in implementing new packaging designs for the domestic and international markets. Additional tasks included art direction as well as identity and collateral design as needed.

Education

Started post graduate studies in design at the Rochester Institute of Technology and completed a B.S. in Communication Design as well as a B.A. in Psychology from the State University of New York, College at Buffalo. However, I've had to unlearn much of this to once again be creative.
